Introduction

Violence of any type has no place in schools. In the absolute worst cases, such incidents may end with loss of life. Yet other instances of violence and disruption, such as assaults, sexual offenses, bomb threats and weapons possession, can also cause serious physical and emotional harm. Students need and deserve a safe learning environment. Parents, educators, the public and State policymakers agree that student safety must be a top priority in every school.

In an effort to secure school buildings from both internal and external threats, school districts in New York State are spending millions of dollars annually to install security cameras and metal detectors and restrict access to school buildings by reinforcing entrances. These figures do not include spending on personnel, such as school resource officers or staff to handle oversight of entrances, which is not separately reported.

This report summarizes some of the information reported by New York’s public school districts on violent and disruptive incidents and expenditures on school building security materials and equipment, and includes a series of regional profiles.

In these difficult times, including what can feel like an epidemic of violence and mass shootings, it is critical that school and government officials, parents, and communities at large are aware of what’s happening in our schools. The Office of the State Comptroller’s (OSC) audits and reports are assessing school districts’ reported data and their compliance with requirements designed to ensure that we are providing the safest, most effective educational environment possible for our children and school personnel.

New York State School Safety by the Numbers

Violent and Disruptive Incidents in Schools: School Year (SY) 2017-18 (includes New York City and charter schools)

32,084 Total Incidents

- **14,144** Assaults
- **7,006** Alcohol or Drugs
- **5,464** Weapons Possession
- **4,583** Sexual Offenses
- **692** False Alarms
- **194** Bomb Threats
- **1** Homicide

Capital Expenditures on School Building Security: SY 2013-14 to 2017-18 (excludes New York City and charter schools)

\$27.1 million Total Spending

- **\$15.1 million** on Security Cameras
- **\$4.4 million** on Interior Hardened Doors
- **\$3.4 million** on Exterior Hardened Doors
- **\$3.5 million** on Electronic Security Systems
- **\$670,328** on Metal Detectors

School Safety and the SAVE Act

In 1999, a State-authorized task force consisting of parents, teachers, school administrators, law enforcement experts, business leaders, mental health professionals and local elected officials was created for the purpose of providing recommendations on how to prevent school violence and increase the safety of students and teachers in New York’s public schools. The task force’s work was referred to as “Project SAVE” and it helped shape the Safe Schools Against Violence in Education (SAVE) Act, which was adopted into law in 2000, a year after the tragic school shooting at Columbine High School in Colorado.¹

The SAVE Act requires all New York State public schools, including charter schools, to document “violent and disruptive incidents” taking place on school property, including incidents occurring in or on a school bus, and at school functions. This data is then used to create lists of “persistently dangerous schools.”²

It also requires the board of education of every school district in the State, every board of cooperative educational services (BOCES) and every county vocational education and extension board, and the chancellor of the New York City school district, to develop comprehensive district-wide and building-level school safety plans. Investments in school building security equipment and materials – i.e. video surveillance cameras, “hardening” of exterior and interior doorways, and alarm systems, among other things – may be included in the comprehensive safety plans and their expenditures are reported to the New York State Education Department (SED) through school district annual financial filings.

This report uses the data outlined above, as reported by school districts and charter schools to SED, to describe the overall level of safety and preparedness of schools statewide. It does not assess the accuracy of the reporting by individual school districts, nor the effectiveness of SED in overseeing such reporting, although several audits by this agency have found schools that have underreported or miscategorized violent or bullying incidents.³ However, the data are still useful in helping to understand the different challenges facing schools depending on what grades they serve, the background of their students, and even what region of the State they are in.

Recent Audits of SAVE Act Planning Requirements

OSC recently completed a series of audits on the implementation and oversight of the SAVE Act’s planning requirement. The first audit reviewed SED’s oversight of school safety planning and found that SED was not sufficiently monitoring school districts’ compliance with the requirements for school safety planning and other requirements related to the Act.⁴ The next audit examined the New York City Department of Education’s implementation of school safety planning requirements, at the school district and school building level. This audit found that the Department needs to improve its compliance with the school safety planning requirements outlined in the Law and State and City Regulations.⁵ Most recently, OSC released a global summary of a series of audits conducted in 17 school districts and two charter schools in the rest of the State, which found that none of the school safety plans met all the minimum requirements of the SAVE Act and that no schools met all of the annual safety training requirements.⁶

School Safety and Educational Climate

Incident Category

SED publishes aggregated data reported by schools on violent and disruptive incidents in its School Safety and Educational Climate (SSEC) summary. In school year (SY) 2017-18, over 4,700 New York State public and charter schools, with a combined student population of nearly 2.7 million, reported a total of 32,084 violent and disruptive incidents.⁷

The most commonly-reported type of incident was assault. Assaults that are reported to SED by school districts involve some level of injury. This can include anything

from a playground fight that results in a black eye, abrasion or headache (reported as “assault with physical injury”) to an altercation that requires a visit to the emergency room or even a hospital stay (reported as “assault with serious physical injury”). Schools reported a total of 14,144 incidents of assault of all kinds, or 44 percent of the total incidents. (See Figure 1.) Assaults with serious physical injury accounted for less than one-tenth of all assaults.

Alcohol and drug-related incidents (just over 7,000) were the next most common type and include illegally using, possessing, or being under the influence of a controlled substance, marijuana, or alcohol. Drugs are much more commonly reported than alcohol, making up over 84 percent of these incidents.

Weapons possession accounted for 17 percent of total incidents. Weapons include, but are not limited to, firearms, knives and explosives. Just over 30 percent of these weapons were found through routine security checks, with the rest discovered under other circumstances.

Sexual offenses comprise a wide range of behaviors. By far the most common were “other sexual offenses” (89 percent), which include inappropriate touching of another student on a part of the body that is generally regarded as private and sexual conduct involving a child who is incapable of consent by reason of disability or age. The more serious incidents were forcible sexual offenses (11 percent), which include incidents of rape and sodomy.

False alarms and bomb threats together were less than 3 percent of the total incidents reported statewide. One homicide was reported by public schools in SY 2017-18.

Figure 1

School Violent and Disruptive Incidents Reported by Category, SY 2017-18

Category	Number of Incidents	As a Share of Total Incidents	Incidents Per 1,000 Students
Assault	14,144	44.1%	5.3
Alcohol or Drugs	7,006	21.8%	2.6
Weapons Possession	5,464	17.0%	2.0
Sexual Offenses	4,583	14.3%	1.7
False Alarm	692	2.2%	0.3
Bomb Threat	194	0.6%	0.1
Homicide	1	<0.1%	<0.1
Total Statewide Incidents	32,084	100.0%	12.0

Source: New York State Education Department (SED), School Safety and Educational Climate (SSEC), SY 2017-18, with calculations by the Office of the State Comptroller (OSC). Includes charter schools but does not include Pre-K only schools.

Grade Organization

Schools of different grade levels face different types of challenges. Elementary schools, with nearly 1.3 million pupils, reported the lowest rate of incidents (8.7 per thousand students). But violent and disruptive incident rates climb with grade level: middle or junior high schools had 13.6 incidents per 1,000 students and senior high schools had 15.1 incidents per 1,000 students. (See Figure 2.)

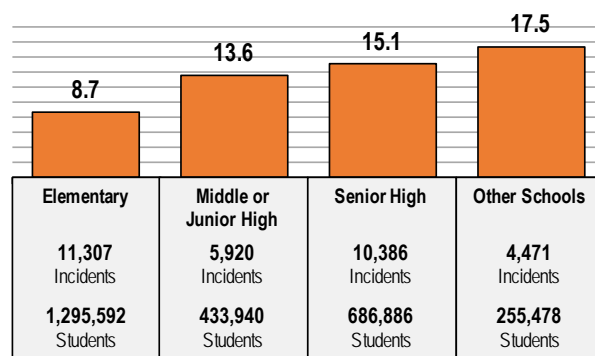

Assaults made up nearly 63 percent of the total incidents in elementary schools, with sexual offenses accounting for another 20 percent. By high school, the largest percentage of incidents involve alcohol and drugs (44 percent), followed by assaults (25 percent).

This is not to say that assaults and sexual offenses go away in higher grade levels. The rate of assaults per 1,000 students is 3.8 in high school, higher than for any category of incident other than alcohol and drugs. Sexual offense rates are slightly higher in middle or junior high schools than in elementary schools, although they drop in high school. In addition, the severity of the incidents is different: the percentage of assaults that resulted in serious injuries rises from 5 percent in elementary to nearly 9 percent in high school. Similarly, while just over 7 percent of sexual offenses in elementary schools were forcible offenses, in high school this rises to over 16 percent.

Figure 2

School Violent and Disruptive Incidents by Grade Organization, SY 2017-18

Total Incidents Per 1,000 Students

As a Share of Total Incidents By Category

Incidents Per 1,000 Students by Category

Category	Elementary	Middle or Junior High	Senior High	Other Schools
Alcohol and Drugs	0.2	2.2	6.6	4.8
Assault	5.5	5.9	3.8	7.4
Bomb Threat	0.0	0.1	0.1	0.1
False Alarm	0.2	0.3	0.3	0.4
Sexual Offenses	1.8	2.4	1.1	1.9

Notes: Other schools include junior-senior high and K-12 schools, along with 8 schools that did not have an identifiable grade organization. One homicide occurred in other schools.

Need/Resource Capacity

Violent and disruptive incidents in schools also vary depending on the type of district the school is in. SED uses a need/resource capacity index as a broad measure of student need relative to school district wealth.⁸ (New York City is not included in this discussion, but it is included in the Regional Overview section starting on page 6.)

The large city school districts of Buffalo, Rochester, Syracuse and Yonkers (shown as the “Big 4 Cities”) had the highest incident rate (13.2 per thousand students). However, high-need rural and high-need urban/suburban districts had high rates as well (11.7 and 11.3 incidents per 1,000 students, respectively). These three categories of high need districts, added together, serve close to half a million of the State’s children. Average-need school districts, which serve the largest group – 742,000 pupils – had a lower rate, but still had the highest total number of incidents (outside of New York City). Low-need schools had the fewest incidents per thousand students, with 4.8. (See Figure 3.)

Weapons possession accounted for 36 percent of all incidents in the Big 4 Cities, and 22 percent in other high-need urban/suburban districts, making it a much larger issue for those schools than in high-need rural school districts, where alcohol and drug incidents were more common.

Figure 3

School Violent and Disruptive Incidents by Need/Resource Capacity, SY 2017-18

Total Incidents Per 1,000 Students

As a Share of Total Incidents by Category

Incidents Per 1,000 Students by Category

Category	High Need			Average Need	Low Need
	Big 4 Cities	Urban/Suburban	Rural		
Alcohol and Drugs	3.4	3.2	3.9	3.3	2.2
Assault	3.9	4.4	4.7	3.2	1.7
Bomb Threat	0.1	0.0	0.1	0.1	0.0
False Alarm	0.4	0.3	0.3	0.2	0.1
Sexual Offenses	0.8	0.8	1.0	0.7	0.3
Weapons Possession	4.7	2.5	1.7	1.2	0.4
Total Incidents	13.2	11.3	11.7	8.6	4.8

Source: SED, SSEC, SY 2017-18, with calculations by OSC. Does not include charter schools, New York City schools and Pre-K only schools. Data labels that are less than 6.0 percent are not shown in the stacked bar chart.

Notes: Big 4 Cities comprise the dependent city school districts of Buffalo, Rochester, Syracuse and Yonkers.

Although alcohol and drug-related incidents were the biggest issue for districts with higher wealth levels, their rate of 2.2 incidents per 1,000 students was substantially lower than in other districts. Conversely, although these incidents represented a smaller share of the total in high- and average-need districts, the rate in those districts is higher: between 3.2 and 3.4 incidents per thousand students in most of these categories, and 3.9 in high-need rural districts. Similarly, while assaults accounted for a similar percentage of incidents in most types of districts, the rate of assaults per thousand students was considerably lower in low-need schools (1.7) than in average-need schools (3.2), and highest in high-need rural districts (4.7).

Regional Overview

New York City's public schools, which serve 1.1 million (40 percent) of the State's 2.7 million students, reported 17,991 incidents, or 56 percent of the State's total.

Even though a recent OSC audit found that the City's schools had underreported and misclassified similar types of data in the past, New York City's rate of 16.8 incidents per thousand students was higher than any other region in New York. The City's rate was also higher than the Big 4 Cities in the need/resource capacity discussion above. In contrast, the other (largely suburban) downstate districts of the Long Island and Mid-Hudson regions had the lowest rates in the State, at 6.1 and 7.6 incidents per thousand, respectively.⁹ Upstate incident rates varied less, from 9.0 in the North Country to 12.0 in the Capital District. (See Figure 4.)

The types of incidents reported varied considerably by region. Downstate, New York City's most frequently reported incidents were assault, sexual offenses and weapons possession, while the Long Island and Mid-Hudson regions' schools had a much larger proportion of drug and alcohol incidents. Upstate, assaults were most frequently reported by schools in the North Country and the Capital District, while alcohol and drug incidents were more common in the Southern Tier and Mohawk Valley regions. Central New York reported a much higher percentage of weapons possessions incidents in the State than any other region did, and Mohawk Valley and North Country schools reported higher rates of sexual offenses.

New York City has high overall incident rates including a high percentage of assaults, reporting 8.3 assaults per thousand students, the highest in the State and significantly higher than the next region (Capital District at 5.3). The City also reported 3.3 sexual offenses per 1,000, which was three times higher than the second-highest region (Mohawk Valley with 1.1). However, the City also had the lowest rates of alcohol and drug-related incidents in the State, while other regions ranged from 2.3 to 4.4 incidents per thousand students. (For additional regional statistics, go to the Regional Profiles section starting on page 12.)

No Incidents

Just over one-fourth, or 1,210, of all public and charter schools that submitted violent and disruptive incident data reported having no incidents of any kind in SY 2017-18. Collectively, these schools had a student population of over half a million.

When looking at schools by grade level, elementary schools were far more likely to report no incidents (nearly 40 percent of all, or 1,034 schools) compared to middle or junior high schools (11 percent) and senior high schools (3.4 percent). (See Figure 5.)

By school district type, over half (or 301) of the schools in low-need districts reported having no incidents. Average-need districts also had a substantial share of schools without incidents (38 percent, or 525 schools). Conversely, 17 percent, or 31, of the schools in the Big 4 Cities reported no incidents.

Regionally, downstate schools displayed a stark contrast between New York City (where only 8.3 percent reported having no incidents) and its mainly suburban neighbors. Nearly half of Long Island's schools reported no incidents, as did 41 percent of schools in the Mid-Hudson region. Upstate, the portion of schools reporting no incidents was lower in the western part of the State (the Finger Lakes, Southern Tier and Western New York) than in other regions.

Notes: Other schools include junior-senior high and K-12 schools, along with 8 schools that did not have an identifiable grade organization. Big 4 Cities comprise the dependent city school districts of Buffalo, Rochester, Syracuse and Yonkers.

Building Security Expenditures

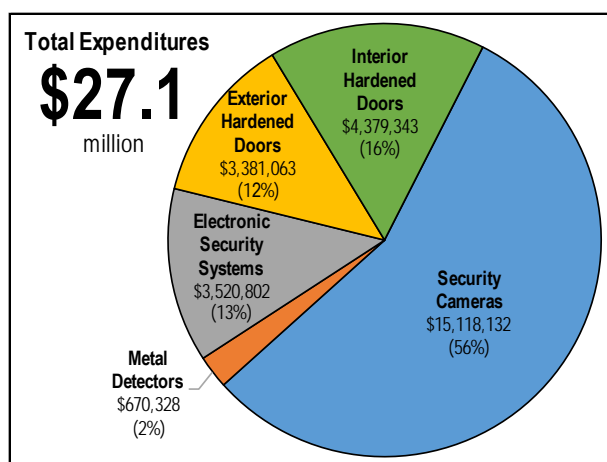

School districts have made investments in building security materials and equipment over the years to improve school safety, and they report on certain of these in their annual financial filings with SED. They also report whether these investments are included in their district-wide school safety plans.¹⁰ These one-time capital investments represent just a fraction of the total spending on school safety improvements: some spending – such as the employment of school resource officers or staff to handle oversight of entrances – is not separately reported.

Outside of New York City, school districts reported spending just over \$27 million on these types of building security materials and equipment from SY 2013-14 to 2017-18.¹¹ Over 50 percent, or \$15 million, of these expenditures went towards “security cameras,” defined as the purchase of video surveillance equipment, including installation costs. (See Figure 6.)

Nearly \$8 million went to hardening of interior (\$4.4 million) or exterior doors (\$3.4 million). Hardening doors includes the purchase and installation of commercial door jams, deadbolt locks and re-enforced screws, plates and hinges. School districts also spent \$3.5 million on electronic security systems for operations such as access and intrusion controls, including alarming facilities.

Figure 6

Total School Building Security Capital Expenditures, SY 2013-14 to 2017-18

Source: SED, State Aid Management System (SAMS), SY 2013-14 to 2017-18, with calculations by OSC. Does not include charter schools or the New York City school district. Totals may not sum to 100 percent due to rounding.

Smart Schools Bond Act

The expenditures discussed in this section are all funded by traditional State building aid. Schools can also receive funding for “high-tech security” under the \$2 billion Smart Schools Bond Act (SSBA), which can be used to fund school and community connectivity, classroom technology, Pre-K classrooms, and to replace transportable classrooms.¹² As of July 1, 2019, a total of 289 school districts had been approved for \$145 million in SSBA funding for high-tech security projects including video surveillance, emergency notification systems and physical access controls; relatively little SSBA funding had actually been spent.¹³

As shown in Figure 7, the highly populated downstate regions of the State spent the most in total dollars: Long Island schools spent over \$6 million on school building security equipment and materials from SY 2013-14 to 2017-18, and Mid-Hudson schools reported spending another \$5.6 million. However, the Mohawk Valley and North Country regions spent the most on a per pupil basis, at \$6.74 and \$6.30, respectively. Western New York schools reported spending the least, both in total and per pupil.

Figure 7

School Building Security Capital Expenditures by Region, SY 2013-14 to 2017-18

Region	Total Expenditures (Over 5 Years)	Total Expenditures Per Pupil
Long Island	\$6,171,677	\$2.76
Mid-Hudson	\$5,617,347	\$3.31
Finger Lakes	\$3,147,872	\$3.74
Southern Tier	\$2,225,718	\$4.71

Mohawk Valley	\$2,158,076	\$6.74
North Country	\$1,889,782	\$6.30
Capital District	\$1,878,871	\$2.61
Western New York	\$1,771,915	\$1.89
New York State	\$27,069,668	\$3.34

Source: SED, SAMS, SY 2013-14 to 2017-18, with calculations by OSC. Does not include charter schools or the New York City school district.

Conclusion

In order to learn effectively, students need to feel safe. Many students, along with those working in our educational institutions, are confronted with violent and disruptive activity on a regular basis. Fighting and other types of assault are a big part of the problem, and many schools also struggle with the prevalence of alcohol and drugs on school grounds, sexual offenses and students bringing weapons to school.

The public rightly demands that school officials take the necessary actions to ensure the safety of all students, from both external and internal threats. An appropriate response in a specific school district and even a specific school building will likely be somewhat different depending on the number and mix of risks the students face.

For this reason, the collection of data on violent and disruptive incidents is an important aspect of New York State's SAVE Act. As this report shows, one size does not fit all as far as school safety is concerned. Students at different grade levels, in schools of different levels of need, and in different parts of the State face different profiles of risk, and schools must manage accordingly. This means that the quality of the data reported is also of utmost importance. OSC audits have found that schools have tended to underreport violent and disruptive incidents and to misclassify the incident types, especially with regard to their severity. The labeling of schools with a high School Violence Index as "persistently dangerous" may be a disincentive to proper reporting. But accurate data is critical for the State and its school districts to make decisions about how to make students safer.

Of course, these reports focus on the most common types of violence and disruptive incidents experienced by students and teachers. School district officials must also be concerned about the rare and devastating incidents, such as active shooter emergencies. Schools spent more than \$27 million over the last five years to add safety features such as security cameras, alarms and deadbolts, although recent controversial security measures taken by school officials show that school districts must strike a balance between providing a safe learning environment and protecting the privacy of students.¹⁴ Planning is also vital when trying to anticipate such potentially deadly incidents, and our recent audits show that many schools need to do more to enhance this function.

Notes: Other schools include junior-senior high and K-12 schools, along with 8 schools that did not have an identifiable grade organization. Big 4 Cities comprise the dependent city school districts of Buffalo, Rochester, Syracuse and Yonkers.

*These need/resource capacity categories are not included in the report.

Notes

¹ Chapter 181 of the Laws of 2000 enacted Project SAVE, the Safe Schools Against Violence in Education Act. For more information and resources on Project SAVE and New York State’s SAVE Act, go to www.nyscfss.org/project-save-safetyplans and www.p12.nysed.gov/sss/ssae/schoolsafety/save/.

² In 2017, an amendment to the New York State Commissioner’s Regulations, Section 100.2 (gg), was adopted by the Board of Regents, thus creating the School Safety and Educational Climate (SSEC) summary data collection where public school districts and charter schools began submitting all Violent and Disruptive Incident Reporting (VADIR) data starting in SY 2017-18. In accordance with federal law, VADIR data are weighted to reflect the most serious violent incidents, using a combination of a school’s School Violence Index and Weighted Incident Exclusion Process. The purpose of such data is to determine which public elementary and secondary schools are considered “persistently dangerous.” For more information on SSEC and VADIR reporting requirements and methodology, go to www.p12.nysed.gov/sss/ssae/schoolsafety/vadir/.

³ See Office of the New York State Comptroller (OSC), *State Education Department Compliance With the Safe Schools Against Violence in Education Act (2013-S-71)*, January 2015, www.osc.state.ny.us/audits/allaudits/093015/13s71.pdf. See also OSC, *Implementation of the Dignity for All Students Act: New York City Department of Education (2017-N-6)*, March 2019, www.osc.state.ny.us/audits/allaudits/093019/sga-2019-17n6.pdf.

⁵ OSC, *Compliance With School Safety Planning Requirements: New York City Department of Education (2018-N-2)*, June 2019, www.osc.state.ny.us/audits/allaudits/093019/sga-2019-18n2.pdf.

⁶ OSC, *Safe Schools Against Violence in Education (SAVE) Act – Safety Plans (2019-MS-1)*, July 2019, www.osc.state.ny.us/localgov/audits/swr/2019/safe-schools/global-2019-ms-1.pdf.

⁷ For the purpose of this report, some of the VADIR categories were merged together. For a definition of VADIR categories, go to www.p12.nysed.gov/sss/ssae/schoolsafety/vadir/glossary201718.html.

⁸ High-need categories include large city (the dependent city school districts of Buffalo, Rochester, Syracuse and Yonkers, referred to as “Big 4 Cities”), urban/suburban high-need and rural high-need. For this report, the need/resource capacity categories of New York City and charter schools were not included. However, New York City is included in the regional overview section.

⁹ For this report, “downstate” includes the regions of Long Island, Mid-Hudson and New York City, while “upstate” includes the Capital District, Central New York, Finger Lakes, Mohawk Valley, North Country, Southern Tier and Western New York regions.

¹⁰ Charter schools and the New York City school district do not report their expenditures on school building security materials and equipment to SED.

¹¹ School districts use Form FB, Schedule N, to submit their total expenditures on school building security materials and equipment through the SED’s State Aid Management System. For more information on the various types of expenditures reported by school districts, go to stateaid.nysed.gov/sams/. Since these are one-time capital expenditures, the discussion in the section is based on aggregated spending over the most recent five years reported, SY 2013-14 through 2017-18.

Notes

¹² The Smart School Bond Act was included in Chapter 56 of the Laws of 2014, as part of the State Fiscal Year (SFY) 2014-15 Enacted Budget, and was approved by the voters in a statewide referendum held during the 2014 General Election. See Education Law Section 3641(16).

¹³ As of July 1, 2019, the State had approved plans for over \$1.4 billion in total Smart School Bond Act spending. See New York State Education Department, *Smart Schools*, last updated June 27, 2019, at www.p12.nysed.gov/mgtserv/smart_schools. As of the end of SFY 2019-20, the State had reported spending \$235 million of this amount, with no breakdown by expenditure category. See *New York State Enacted Capital Program and Financing Plan* reports for SFY 2017-18, 2018-19 and 2019-20, which may be found at www.budget.ny.gov.

¹⁴ Jeff Preval, “State tells Lockport Schools to stop using facial recognition, again,” *WGRZ*, June 28, 2019, www.wgrz.com/article/news/state-tells-lockport-schools-to-stop-using-facial-recognition-again/71-abc0e45d-82ba-462e-8c24-b97614b7412a.
